Design load based on maximum allowable deflection on landing members. Allowable foot pressure will be subject to roof build-up, typically detailed by a structural engineer.

Working conditions: Suitable for internal or external applications in temperatures between -40°C to +80°C

13, 19 & 36mm
(6mm allen key)
40Nm on step bolts
& stringers to landing
35Nm on handrail
bracket bolts
30Nm on handrail
grub screws

Installation and application considerations should include health, safety and environmental needs, regulations and standards, codes of practice, climate conditions, installation location, product orientation, evaluation of the roof structure, composition, surface and condition, ancillary and complimentary products and materials. Big Foot Systems recommend that all rooftop products are handled and installed by suitably qualified persons. All scheme designs are based on the use of Big Foot Systems' products and materials only.
